Data collected from a community of national and international design practices including:
AHMM
Allies and Morrison
Aukett Swanke
BVN Architectural Services
Corstorphine + Wright
Fletcher Priest Architects
Glenn Howells Architects
Grimshaw
PRP
Rogers, Stirk, Harbour and Partners
Scott Brownrigg
Sheppard Robson
Simpson Haugh
Stephen George + Partners
TTSP
Wilkinson Eyre Architects
Zaha Hadid Architects

2.59

Q1
The Revit platform has seen major development investment in the last 5 years and warrants the substantial increase per head in licence costs and subscriptions

2.55

Q2
The Revit Platform is written to fully utilise the facilities available in today's real and virtual PC workstations and laptops, such as multi-core processors and powerful GPUs

3.18

Q3
Despite being 20 years old Revit meets the industry needs now and for the foreseeable future. Current development initiatives are well communicated and are progressing successfully and are well resourced to meet future industry needs and should be realisedin the near future

2.77

Q4
Autodesk's proactive support of International ISO standards and industry interoperability standards such as IFC is competitive and innovative and opens access to projects by complimentary technologies

2.50

Q5
The consistent sales model that Autodesk continues to deploy is in the spirit of client and supplier partnership, consistently providing added value and includes the ability to effectively administer and visualise all forms of product licensing, installation, upgrades, user reallocation, uninstallation and enterprise deployments

2.95

Q6
Autodesk's software collections are streamlined, fit for purpose and successfully interoperate across platforms adding sufficient value to justify today's costs

3.09

Q7
The Revit platform natively supports all the required forms of geometry for computational design and the complex design forms required for manufacture and construction

2.64

Q8
Autodesk has a clear vision and roadmap for the future of its digital design platform built upon a culture of partnership with its customer base

2.95

Q9
Autodesk is a trusted partner that has empathy with our business dynamics and the need for the security of our intellectual property. We have no issues in utilising Autodesk cloud tools for internal and external collaboration
